

SUSTAINABLE ENGINEERED SOLUTIONS.

| CAPABILITY STATEMENT

WHO
WE
ARE

CAPABILITY STATEMENT

TCE was founded upon the idea of creating a ‘one stop shop’ for clients requiring sustainable engineering solutions for their deconstruction, remediation, civil, infrastructure challenges – all under the one roof.

TCE has experienced unprecedented growth, taking TCE to our current leading position within the industry.

As a consequence of our extensive industry knowledge, skill and experience, TCE have rapidly developed a strong reputation for consistently delivering sophisticated and complex civil, deconstruction and environmental solutions of exceptional quality, within client budgets and strict deadlines.

TCE have deep-seated values, which are exhibited and upheld in all of our dealings.

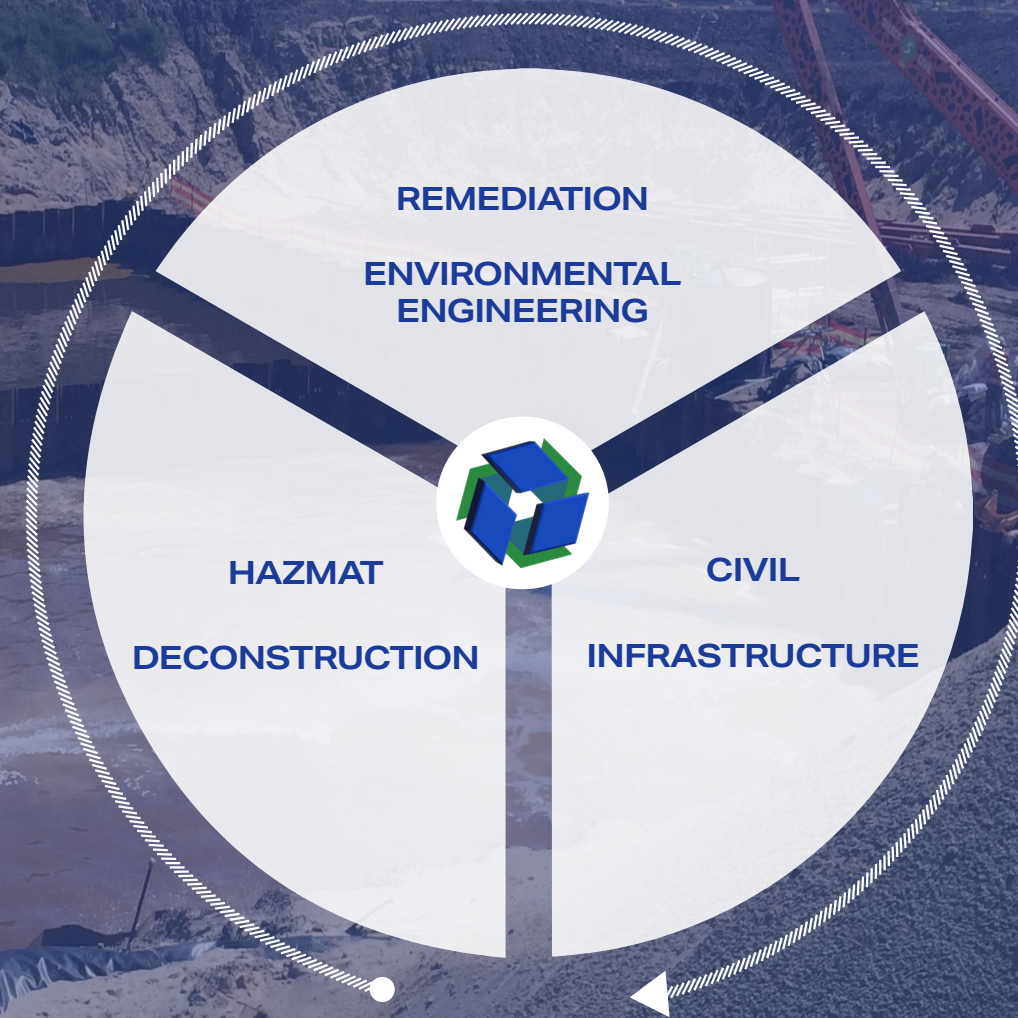

Our Values are Health and Safety, Our People, Integrity, Collaboration, Excellence and Innovation.

In upholding Our Values, TCE ensures best project outcomes for all of our Clients and Project Stakeholders.

TCE is a leading provider of deconstruction, environmental engineering civil, infrastructure and contracting services. Our team of dedicated professionals allows us to offer the best and most value for money sustainable engineered solutions to our clients.

TCE has in-house technical ability, resources and know-how to provide complete planning, and delivery solutions through all stages of a project life-cycle.

**TCE CAPABILITIES
PROJECT LIFECYCLE**

HAZMAT & DECONSTRUCTION

Whether it is residential, commercial, industrial, mining, onshore or offshore, TCE provides turnkey services including decontamination, decommissioning, bonded or friable hazmat removal, solids and liquid waste management, and complete structural demolition.

“TCE’s Integrated Management System (IMS) is tailored to suit all of our project and client requirements. Whether it is our deconstruction, remediation or civil infrastructure projects. Our paperless IMS Systems offer our clients real time and comprehensive WHS, Environmental and Quality Management.”

SCOTT MARSHAL,
IMS MANAGER

TCE is world class recognised deconstruction contracting service provider.

With our on-ground hands-on and highly experienced team of professionals, coupled with our in-house leading-edge deconstruction technologies, we can provide best sustainable engineered approach to complex deconstruction projects.

Our ability to successfully deliver hazmat removal, decommissioning, deconstruction, remediation and civil infrastructure means that our clients can rely on the one team and rest assure the most sustainable, efficient, cost effective, and value for money approach can be achieved throughout the project life cycle.

“We have the resources, expertise and know-how to offer turn-key solutions for our clients. From early works such as HAZMAT removal, deconstruction, waste management and remediation, through to complete civil and infrastructure - TCE can deliver your project from start to finish.”

RAY CHEDRAOUI,
HAZMAT AND DEMOLITION OPERATIONS MANAGER

REMEDIATION

TCE is a market leading environmental engineering specialist, with a proven industry track record of successfully delivering complex sensitive contaminated land remediation projects nationally.

“TCE bring a unique and fresh approach to problem solving and environmentally sustainable engineered project execution.”

FAHMI REZA
REMEDATION OPERATIONS MANAGER

TCE is at the cutting edge of market practices for early works packages to remediate and rehabilitate brownfield sites ready for its new potential use.

TCE employ the latest remediation technologies and have the experience, knowledge and capability to deliver optimal approach solutions and desired outcomes for specific site challenges.

TCE are committed to waste reduction, sustainability and making our communities and environments safer and cleaner for the future. TCE demonstrates this steadfast commitment by detailed material handling, waste segregation and treatment, maximisation of on-site and offsite material re-use and recycling and minimisation of waste material leaving site to landfill.

At TCE, our dedicated inhouse water team excels in the execution of contaminated groundwater projects, technical advisory services, and the design, commission and operation of temporary groundwater treatment solutions including “pump and treat” type system.

Our expertise spans the full spectrum of services, including:

Design & Supply:

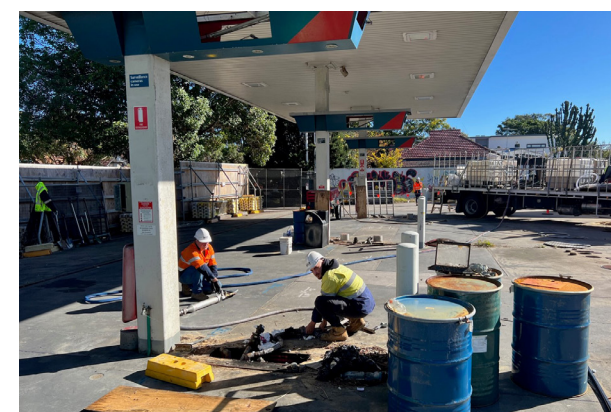

Tailored groundwater treatment solutions for contaminated water treatment to meet site specific stringent discharge criteria.

Rentals:

Providing flexible options for temporary solutions.

Mobile Water Treatment Plant:

Modular solutions for groundwater treatment including PFAS treatment.

OUR CAPABILITIES

OUR VALUES

Health and Safety is our foremost Value.

The health and safety of our people and the wider community is at the forefront of everything we do. From planning stages to project handover, we are unequivocally committed to ensuring that everyone returns home safely each day.

OUR PEOPLE

At TCE, Our People are our most important and valued resource. Our People come from diverse backgrounds, with varied industry experience and industry leading skill sets. All of which cohesively knit into the fabric of the market forefront tapestry which is the one-stop-shop TCE experience for our clients. At TCE, our employees are encouraged to think outside the box and share all their talents, skills and hands-on experience to ensure that the best directions are taken on projects to the benefit of our clients and to the satisfaction of all stakeholders. This all adds up to a culture that drives consultation, innovation, creativity, dedication and excellence.

INTEGRITY

TCE are committed to integrity in all of our dealings. Providing value for money is our key objective in providing sustainable engineered solutions to our clients. We aim to constantly demonstrate our veracity in upholding every one of our service commitments and obligations. You can depend on TCE for honest and fair dealings each and every time.

COLLABORATION

TCE are committed to collective principles: we are adaptive, inclusive, and non-adversarial. We are problem solvers, with a unique vision in tackling and solving issues. Our best-for-project solutions are sought during all stages of design and construction. Our flexible and team-oriented professionals are proud to offer their industry-leading services and expert advice where they can, while listening to the unique needs of our clients in order to offer optimal construction solutions tailored to their requirements.

EXCELLENCE

Our Team is committed to excellence. We are dedicated to the constant and continuous improvement of all areas within our Business. At TCE, our pursuit of constant excellence and improvement is showcased in how we approach all facets of the company.

INNOVATION

TCE are continually looking for better ways to conduct our business. This is evident in all of our dealings, from pre-planning at tender stage, to detailed planning prior to and during project delivery and handover stages.

We are committed to ensuring that all of our processes are smart, efficient, and geared towards producing an end product which is of the highest standards; then we try to make it better.

CERTIFICATIONS

LICENCES AND AFFILIATIONS
